Higher Apprenticeship &
Training Programmes

A real alternative to full-time study.

There's a lot you can learn by going to university but it doesn't need to be full-time. If you know what career direction you want to take, why not start a career whilst also studying at university or college, debt-free, and getting experience under your belt.

What do I need?

If you've completed, or nearly completed your A-levels/BTEC Level 3 or HNC/HND for example, one of our two or three-year Higher Apprenticeship Programmes could be the option for you. Through a combination of formal study and practical work you can achieve a foundation degree or level 4 qualification - dependant on business area - and set your career on the right track.

What will I be doing?

Delivering energy across the nation takes epic feats of engineering. At our world-class training centre in Eakring, Nottinghamshire, we'll show you how we do it. Here, you can specialise in an area of your choice, with expert instruction, hands-on live work, 3D study suites and more. If you want to earn, learn and launch a high-powered career, this is the place to start.

What's in it for me?

On the Higher Apprenticeship Programme, you can earn a competitive salary, acquire a foundation degree or level 4 qualification and gain valuable practical experience. You'll be part of an organisation with ambitious, world-changing plans for the future, with you at the heart of them.

With a starting salary of approx. **£24,000 p.a.**

What career path could I take?

Now you know what you'll be doing, discover what route you can take.

- ▶ Substations, Electricity Transmission
- ▶ Project Planner, Electricity Transmission
- ▶ Transmission Network Control Centre, Electricity Transmission
- ▶ Power Systems, Systems Operator
- ▶ Cyber Security
- ▶ Project Controls, Capital Delivery
- ▶ Commercial, Capital Delivery
- ▶ IT
- ▶ Finance
- ▶ Procurement

Advanced Apprenticeship
Programmes

Real potential. Harnessed properly.

If you enjoy more practical based work and want to start a career whilst furthering your education, why not combine them?

What do I need?

If this is something you are interested in and you've completed or nearly completed your GCSEs, there is the option of a National Grid Advanced Apprenticeship Programme. Through a combination of formal studying and practical application, you'll develop the skills and sharpen the knowledge.

What will I be doing?

Delivering energy across the nation takes epic feats of engineering. At our world-class training centre in Eakring, Nottinghamshire, we'll show you how we do it. Here, you can specialise in an area of your choice, with expert instruction, hands-on live work, 3D study suites and more. If you want to earn, learn and launch a high-powered career, this is the place to start.

What's in it for me?

An Advanced Apprenticeship is your first step to an exciting career with National Grid. After training is successfully completed, you'll take up your role with professional status, whether as an engineer or supervisor. And, just because you've completed your apprenticeship, doesn't mean the learning will stop, as you continue putting into practice your training, and working towards further technical certificates and qualifications.

With a starting salary of approx. **£17,700 p.a.**

What career path could I take?

Now you know what's involved, discover what different routes you can follow on the Advanced Apprenticeship Programme.

- ▶ Substations, Electricity Transmission
- ▶ Mechanical Technician, Gas Transmission
- ▶ Operations, Liquefied Natural Gas
- ▶ Overhead Lines Craftsperson, Electricity Transmission
- ▶ Pipeline Maintenance Centre, Gas Transmission
